Positive displacement meters series SBM 75 - SBM 150

ISOIL PD meter series **SBM** sizes 2"and 3"offers high accuracy: +/- 0,1% (SBM 150) and +/- 0,15% (SBM 75) with a repeatibility better than +/- 0,02%, over a large range of flow rate. This accuracy remains constant during long periods of use. Visual indication of the flow rate measured can be obtained when associated with mechanical register or electronic flow computer directly mounted on the meter or remote by means of a pulses emitter (see VEGA II or VEGA T leaflets).

Operation

While rotating, the vanes are driven by the internal surface of the single body. This means that the self – lubricating vanes are always in contact with the internal surface of measuring chamber, therefore product leakage is avoided and though high accuracy is granted.
The calibration mechanism allows micrometric adjustment. It is not necessary to change gears.
When an electronic counter is used, the calibration mechanism is substituted with a 90° driving gear, if the electronic counter in mounted directly on the meter. If the electronic counter is remote, the meter mounts a pulses emitter or encoder (see Encoder Isoil 6422 data sheet).

Applications

» tank trucks loading and unloading
» biofuel Blending
» aircraft refuelling
» petrochemical products transfer in refineries, loading terminals and pipelines
» calibration of other meters or tanks (Master Meters)

Filtering and air elimination

To assure a measuring accuracy and preserve the meter from damage, the fluid under measurement must be properly filtered and air or gas must be eliminated. Isoil produces a wide range of strainers and strainer – air separators.

Accessories

» pulses emitters: Encoder 6422 Eex-d. Pulses emitter EM 345 Eex-i incorporated in Veeder Root 7887 register
» mechanical temperature compensation: setting "alfa" coefficient (only with Veeder Root 7887 register)
» with VEGA II, compensation is achieved by an algorithm based on "alfa" coefficient or density
» unit drum (for Master Meter): allows the reading of the tens of litre
» instant flow rate indicator: Mechanical needle indicator
» ticket printer: Veeder Root. Zero start or cumulative
» preset register: Veeder Root 7889, with one or two pneumatic micro switches or electric micro switches Eex-d ATEX
» extension for electronic or mechanical counter: L= 250 mm e 500 mm
» preset valve : 2" and 3"
» air check valve: 2" and 3"
